

Finding your facility just got a whole lot easier

Using modern, responsive web design, our Healthcare Unified Technology (HUT) framework gives your patients and consumers the simplest, most intuitive way to find a location through the maps and location feature.

Features

With this feature you can convert your online visitors into patients through the use of modern marketing technologies. Through the implementation of industry design and coding standards, this feature was built with enough flexibility to allow other apps, appstacks and widgets access to the same core features, functionality, design and user interface Including:
